

GETTING AHEAD

Start to develop skills that are relevant to your course before you join HSDC this September!

Engineering – BTEC Level 3 Extended and Subsidiary Diploma

‘Investigating the Chernobyl Disaster’

The purpose of this activity is to start you thinking about the consequences of engineering issues and impact on public safety. This will link to units we will cover in your First Year in engineering materials, health and safety and design and mechanical principles.

Activity:

Investigate and produce an A3 poster on the Chernobyl Disaster and determine the engineering issues that may have had an impact on the fire, the escape routes and the safety measures in place.

There is a useful YouTube documentary entitled ‘Surviving Disaster’ which is a very good starting point!

We look forward to seeing you in September!
