

GETTING AHEAD

Start to develop skills that are relevant to your course before you join HSDC this September!

IT - BTEC Level 3 Extended Certificate

This work is designed to supplement the previous Getting Ahead work.

Task: Introduction to Databases and SQL

The Raspberry Pi Foundation is running a well-regarded course that will introduce you to the basics of relational databases, including practical exercises in searching data, adding and grouping data in SQL databases. If you covered SQL databases in your school, this is an excellent refresher course. If you didn't cover databases at school, this course will help ensure you aren't too stuck when it comes to September.

Sources of information to help you do this exercise
